

Deluxe Packages deploys PECAS Vision MIS/ERP software from Radius Solutions

Flexible Packaging converter integrates operations across its facilities with strategic partner Radius Solutions.

Chicago, IL — March 5, 2010 — Radius Solutions Ltd., the world's largest Enterprise Resource Planning (ERP) software provider focused exclusively on the packaging and printing industry, announced that that Deluxe Packages has implemented PECAS Vision software to support its strategic business objectives.

Deluxe Packages is a leader in providing quality converted material used widely in the food industry, especially in the areas of fresh cut produce, nuts and frozen foods. The company serves national and regional customers like Fresh Express, Ruiz Foods, American Licorice and Sun Maid. Customers choose Deluxe Packages based on their ability to meet their needs across a broad spectrum. The company views quality to their customers as something that starts with order entry, and ends with the consumer buying their product.

Deluxe Packages has made significant capital expenditures over the past three years in equipment, technology and information systems. These improvements are part of their ongoing commitment to provide their customers with the highest levels of quality and customer service in the flexible packaging industry. As part of that investment, Deluxe Packages chose to upgrade its business information management system.

After a thorough evaluation of potential software systems, Radius Solutions' PECAS Vision application was selected. The system was rolled out simultaneously across both of Deluxe Packaging's facilities and is used by every employee in the organization. The implementation process was very smooth, Deluxe Packages not only met the go live date, but was able to process jobs immediately and ship product the very first day.

The company has gained a number of advantages leveraging PECAS Vision. Along with process improvements and data management, the system has provided Deluxe Packages with immediate access to essential business information. "The PECAS Vision system enables key data to be readily available and allows us to maintain our strategic goals of high quality and superior customer service." stated Tom Brehm, Vice President of Deluxe Packages.

“Deluxe Packages has been a great addition to our growing client base and are already active members of our PECAS Vision user community. Our users conferences are designed to facilitate learning and communication which helps our customers maximize the value of their investment in our software. As an organization focused on continuous improvement of our products to be in line with customers needs, we look forward to the partnership of industry leaders like Deluxe Packages,” stated David Taylor, President and CEO of Radius Solutions.
