

Firstan Ltd. Selects Radius Solutions' PECAS Vision As Their Standard ERP/MIS Software Solution.

Folding carton producer looks to gain efficiencies and improve access to critical business information by investing in new software solution.

Sheffield, England – 12 February, 2010 – Radius Solutions Ltd., a leading integrated Business Information Management provider for the Packaging and Printing industry, announced that Firstan Ltd. have chosen to implement the [PECAS Vision](#) ERP/MIS software as their standard solution after a careful selection process.

Firstan Ltd has recently completed a move to a brand new 80,000 sq. ft. facility in Huntingdon, Cambridgeshire, as part of their long term plans to confirm their position as a leading paperboard packaging supplier to the pharmaceutical and food industries. The company's management group was also looking to replace the existing business management software system with an industry specific ERP/MIS solution that would fit the processes of its organisation and provide the required management information to assist with its current growth plans.

Key considerations when choosing the new system were improvements in Costing, Planning/Scheduling, Estimating and Pricing. The ability to generate and provide access to management information was also an important factor in selecting a new system.

Andrew Hartwig, Managing Director at Firstan Ltd described his vision, "We have taken this opportunity to make the new factory a state of the art facility that will increase output, quality and efficiency whilst at the same time lowering our environmental impact. Making these changes we also decided to implement 21st century technology and systems. Along with a substantial investment in machinery we looked for a solutions partner with a leading software system and complete focus on our industry."

Firstan Ltd selected [Radius Solutions](#) as its long term enterprise software applications partner. The strategic partnership will provide Firstan Ltd with a single integrated software system to run its entire operation, allowing improvements in efficiency, immediate access to business information and improved response times to client inquiries.

"We are pleased that Firstan Ltd selected Radius Solutions. We believe they will quickly experience many benefits from the implementation of PECAS Vision", while laying the foundation to support their long term strategic objectives," said Steve Green, Business Development Manager at Radius Solutions.
