Many laughs were shared at Chicago's Lucky Strike lanes during an all attendee group outing at the 2008 Radius Solutions User Conference. To read more information about the conference go to page 2.

Radius Solutions continues momentum in 2008

At the end of 2007 we announced that we exceeded 20% growth, driven by an expanded client base and additional product roll-outs. In 2008 we have continued our focus on managing growth and providing our clients with the best possible product, service and people in the industry.

We are into the second half of 2008, and are pleased that the positive momentum from 2007 has continued. Like many of your companies, our organization has been working toward continuous improvement with an emphasis on measuring and metrics. We also continue our ongoing aggressive reinvestment in our company and solutions, to ensure we remain a leader today and into the future. We know that this relentless quest for excellence will ensure that we continue to separate ourselves out as the leading provider of global ERP software and services focused exclusively on the print and packaging industries worldwide.

Along with other initiatives, has been a focus on putting the right people into the right positions, then empowering them to leverage their experiences and talents to perform at a very high level. On a recent company-wide call I announced that we have experienced more changes in our

European operations in the last year alone than we have in more than a decade. This includes appointing Kevin Blakey as our European Operations Director, as well as Steve Wilson as our new head of Projects for Europe. We have strengthened our support organization with the appointment of regional support managers for both Europe and the United States and added additional staff to our services and support operations globally, as well as new sales and marketing staff in Europe.

Being part of such change can be very invigorating and rewarding as people continue to strive towards levels of product, service and career successes not achieved before. We know that these changes will drive superior results in many ways for our clients, and through their continued success our company will continue to prosper. The old adage "The customer is always right" rings very strongly throughout our company. We have often heard from clients that our professionals are passionate about helping packaging and printing companies achieve superior results. We look forward to continuing to meet and exceed your expectations.

SOLUTIONS

Now available: PECAS Vision CRM and MRP

Two new solutions added to the PECAS Vision suite to offer new and improved capabilities.

Our recent commitment to expand our investment in development has led to significant market and customer-driven enhancements, including two new suites: Customer Relationship Management (CRM) and Manufacturing Resource Planning (MRP).

Customer Relationship Management

PECAS Vision Customer Relationship Management (CRM) is designed to help our customers understand, as well as anticipate, the needs of current and potential customers. Especially when used in concert with our PECAS Vision ERP/MIS solution, PECAS CRM helps make the most of every interaction with every customer across an entire organization.

PECAS Vision CRM helps our clients:

- Gain better visibility into customer data
- Streamline the quotation process
- Increase employee productivity
- Better track key performance data
- Reduce cost of customer service

Manufacturing Resource Planning

PECAS Vision Manufacturing Resource Planning (MRP) helps more efficiently manage production planning, inventory control and manufacturing processes. The cornerstone of the solution is PECAS Vision Master Estimate, which provides the method of creating new jobs and generating a bill of materials. Sales forecasts are compared against existing production jobs,

allowing the system to recommend changes to job required dates and quantities, as well as the creation of new production jobs. PECAS Vision MRP helps our clients:

- Improve workflow
- Establish accurate sales forecasts
- Increase productivity
- Gain insight into manufacturing process
- Improve quality control
- Speed up data entry
- Integrate with the shop floor
- Foster better communications with suppliers

For more information on PECAS Vision CRM and MRP, please visit our web site at www.radiussolutions.com.

Coming soon: PECAS Vision Business Intelligence

PECAS Vision's new Business Intelligence/Business Performance Management offering is a comprehensive, customizable solution to help companies define Key Performance Indicators and scorecard their business performance.

Built on a flexible, advanced framework, PECAS Vision's Business Intelligence can aggregate daily transactional data into business intelligence information that can be measured and monitored for business performance management.

With PECAS Vision Business Intelligence customers can quickly and easily perform multi-dimensional analysis of their organizations such as:

Profitability: Most profitable and least profitable clients, by total sales volume versus margin, by plant, by sales representative, by quarter and by production process.

Production: On time delivery by client, by product type, by process and by carrier.

Financial: Sales versus budget performance by quarter, by month, by year. Time to invoice and cash collection performance.

PECAS Vision Business Intelligence allows for flexible reporting as well as publishing data online, for immediate access via the web, by approved users.

Welcome New Radius Solutions Clients

We are pleased to welcome the following new customers to our global client base.

Hundreds of packaging and print companies and sites around the world leverage PECAS Vision ERP/MIS software to streamline their operations, respond more quickly to customer needs, and provide up-to-the-minute information for accurate and timely decision making. We are proud to add the following new organizations to our list of clients:

KDV Label – provides a full range of pressure sensitive and non-pressure sensitive products. Headquartered in Waukesha, Wisconsin, USA

Impressions – a multi-color printer specializing in the complete production of customized printing and paperboard packaging. Based in St. Paul, Minnesota, USA

Sonoco – a manufacturer of coated or laminated flexible materials made of combinations of paper, plastics film, metal foil, and similar materials for packaging purposes. Based in Hartsville, South Carolina, USA

Lithotype – Lithographer specializing in short run roll to roll flexible pouch packaging. Based in San Francisco, California, USA

inspirepac – offers full design services and produces a wide variety of items in the areas of high quality flexo print, POS, Retail Ready Packaging and Corrugated Packaging. Located in Chesterfield, Derbyshire, UK

Pharmagraphics LLC – is an international printing/packaging company specializing in pressure-sensitive roll labels, package outserts and inserts, specialty products (including extended content labels, hanger labels, and a multi-ply label) and folding cartons for the pharmaceutical, medical device and consumer goods industries. Based in Ovens, Co. Cork, Ireland.

2008 Radius Solutions User Conference

The Radius Solutions 2008 North American Users Conference for PECAS Vision ERP/MIS was held June 11-13th at the Hotel Sax in downtown Chicago, IL, USA. We had record attendance or our highest turn-out at this year's event.

This year we enhanced the agenda to include in depth Master Training Classes led by Radius Solutions experts covering Scheduling, Estimating, Outsource Manager and some of the new Modules of the PECAS Vision application. Dennis Linnevers, of Multi-Color Corporation commented "The extra day of Master Classes really showed how much Radius Solutions values the input of their user community. The focus was not only to explain the modules, but to also ask how we were using them and what changes/improvements we would like to see."

The functional and technical tracks of the Radius Solutions Users Conference were also very well received. The North America Users Conference is specifically designed to help clients maximize the value of their investment in Radius Solutions.

In the News
