

Radius Solutions Announces New European Users Group Board Members

Board members to shape upcoming users conference 11-12, March 2010 at Wolverhampton Racecourse in England.

Sheffield, England, 23 November 2009 – **Radius Solutions, Ltd**, the leading business information management systems provider for the packaging industry, announced the appointment of new board members to head the European Users Group for PECAS Vision and shape the agenda for the upcoming annual users' conference in March of next year.

The European users group helps shape the PECAS Vision software suite while providing a forum for packaging companies using the software system to enhance their skills, leverage the existing software functionality and maximise the return on their investment in the system.

The Users Group is led by a committee representing leading packaging companies from Europe. The group's leadership changes every two years to allow broad participation representing the labels, flexible and folding carton industries throughout Europe.

The new board elected for the group includes; President, Chris Pickerill of Graphic Packaging, Vice President Dannielle Beattie of inspirepac, and sitting board members: Eric Ooft of Alcan Packaging, Glenn Ingram of Boxes (GH), Andy Smith of Chesapeake, Michael Johnston of Dakota Packaging, Paul Backhouse of Parkside Flexibles, Robin Agnew of MSO Cleland and Peter Vernon from A1 Trade Print Services.

“We are very pleased to have this group of top professionals from the packaging industry, volunteer their time and energy to lead the PECAS Vision European users' community. Their leadership and input not only strengthen the PECAS Vision product, but add significantly to the value of the users' conference, stated David Taylor, President and CEO of Radius Solutions.

Unlike many other companies opting for virtual conferences, Radius Solutions will still host an onsite event format for the conference. This decision was based on feedback from the group that networking with peers and having on site workshops provide significant value to the event each year.

The European Users Group is specifically designed to help clients maximise the value of their investment in Radius Solutions. The annual European users' conference provides informative sessions on the latest application and company updates, application training workshops and peer networking opportunities. The conference is also instrumental in providing a forum for input into the PECAS Vision product roadmap. The product roadmap helps to shape the future development and releases of the application.
